03

Data Quality tips & tricks

04

Breakout sessions & wrap-up

Quick notes

During the webinar

- **You are muted by default.** You will have a chance to discuss with your peers during the breakout session.
- **Feel free to use the Q/A** to ask questions.
- **Poll/Survey:** Please take a moment to answer our polls and share your feedback
- **Breakouts:**
 - Choose your session for a deeper dive and Q/A
 - Feel free to raise your hand, we will unmute you

After the webinar

- The Collibra presentation is recorded. The breakout sessions will not be recorded.
- **Access the recording, presentation and additional resources in the Circles section of our [Data Citizens Community](#).**

Today's lineup

Data Office at work

Simla Sivanandan
Senior Manager, Data Intelligence
Collibra

Collibra Data Intelligence Platform

- Find and understand trusted data within an intuitive user experience
- Enable self-service access to data assets
- Provide visibility of BI reports and dashboards

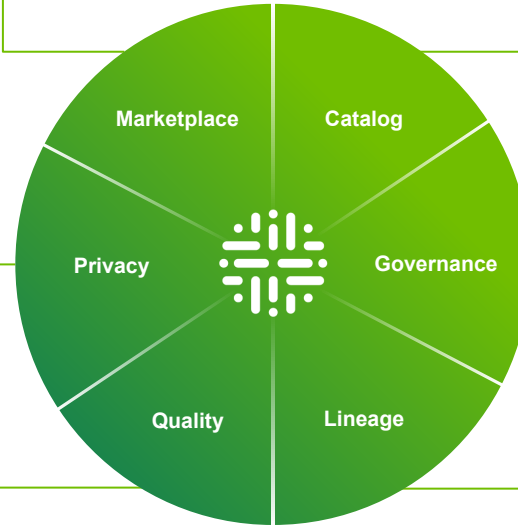

- Catalog all data assets—data sets, reports, KPIs, APIs, and AI models
- Support across hybrid, multi-cloud, and on-prem environments
- Classify and add business context to cataloged data assets

- Enable data experts to set and enforce data policies
- Automate your privacy data map to associate data to processes
- Apply privacy context to data

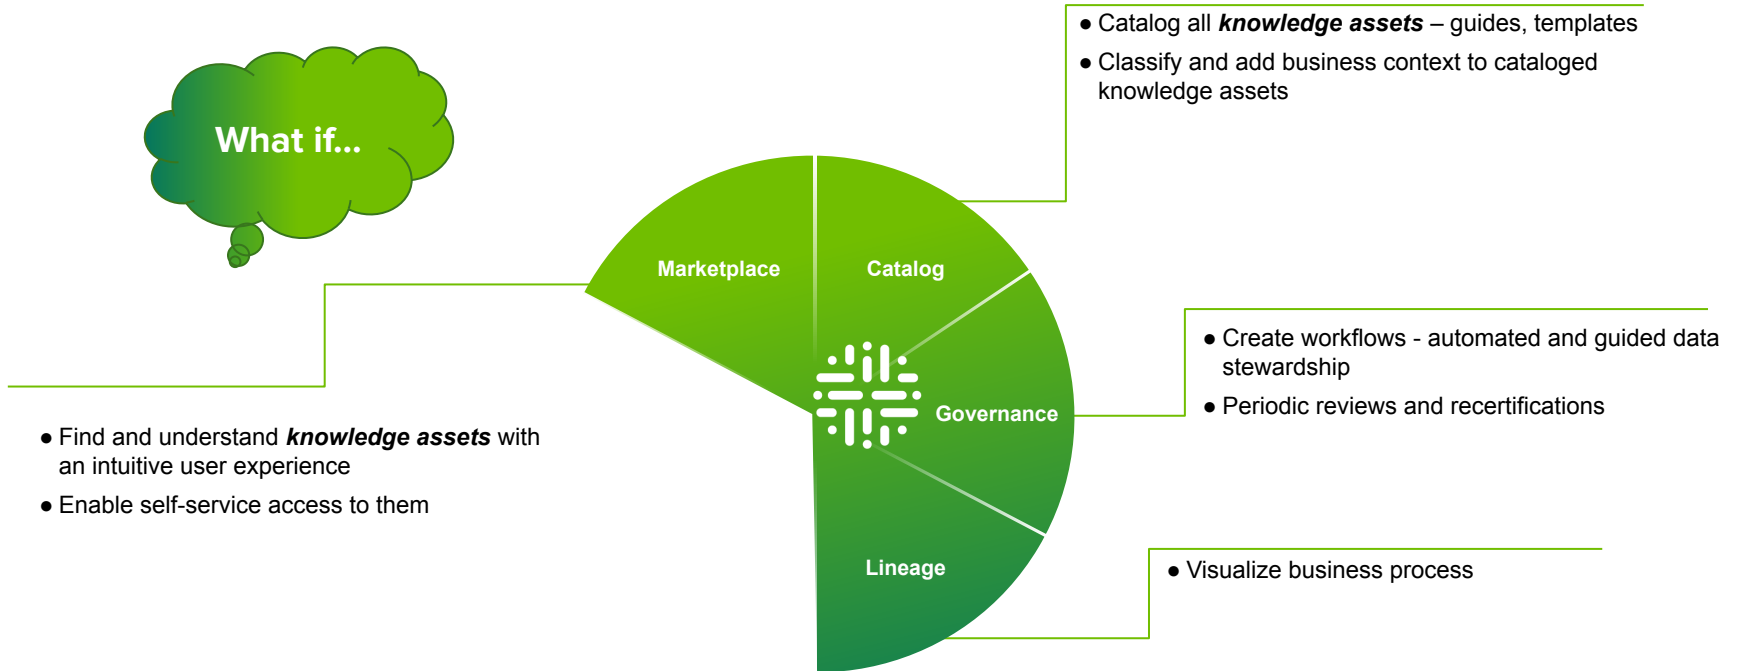

- Leverage AI-generated data quality rules and anomaly detection
- Pushdown execution of rules to the source
- Simply add to data pipelines with APIs

- Federate ownership and governance of data assets
- Create data-centric workflows - automated and guided data stewardship
- Highly flexible that can support complex role / security permissions

- Visualize end-to-end technical lineage
- Include business lineage to align business context to physical data
- Automate lineage scanning and harvesting

Extending the capabilities

Data Quality Tips & Tricks

Laurent

Principal Customer Advisory
Director for Data Quality

Collibra

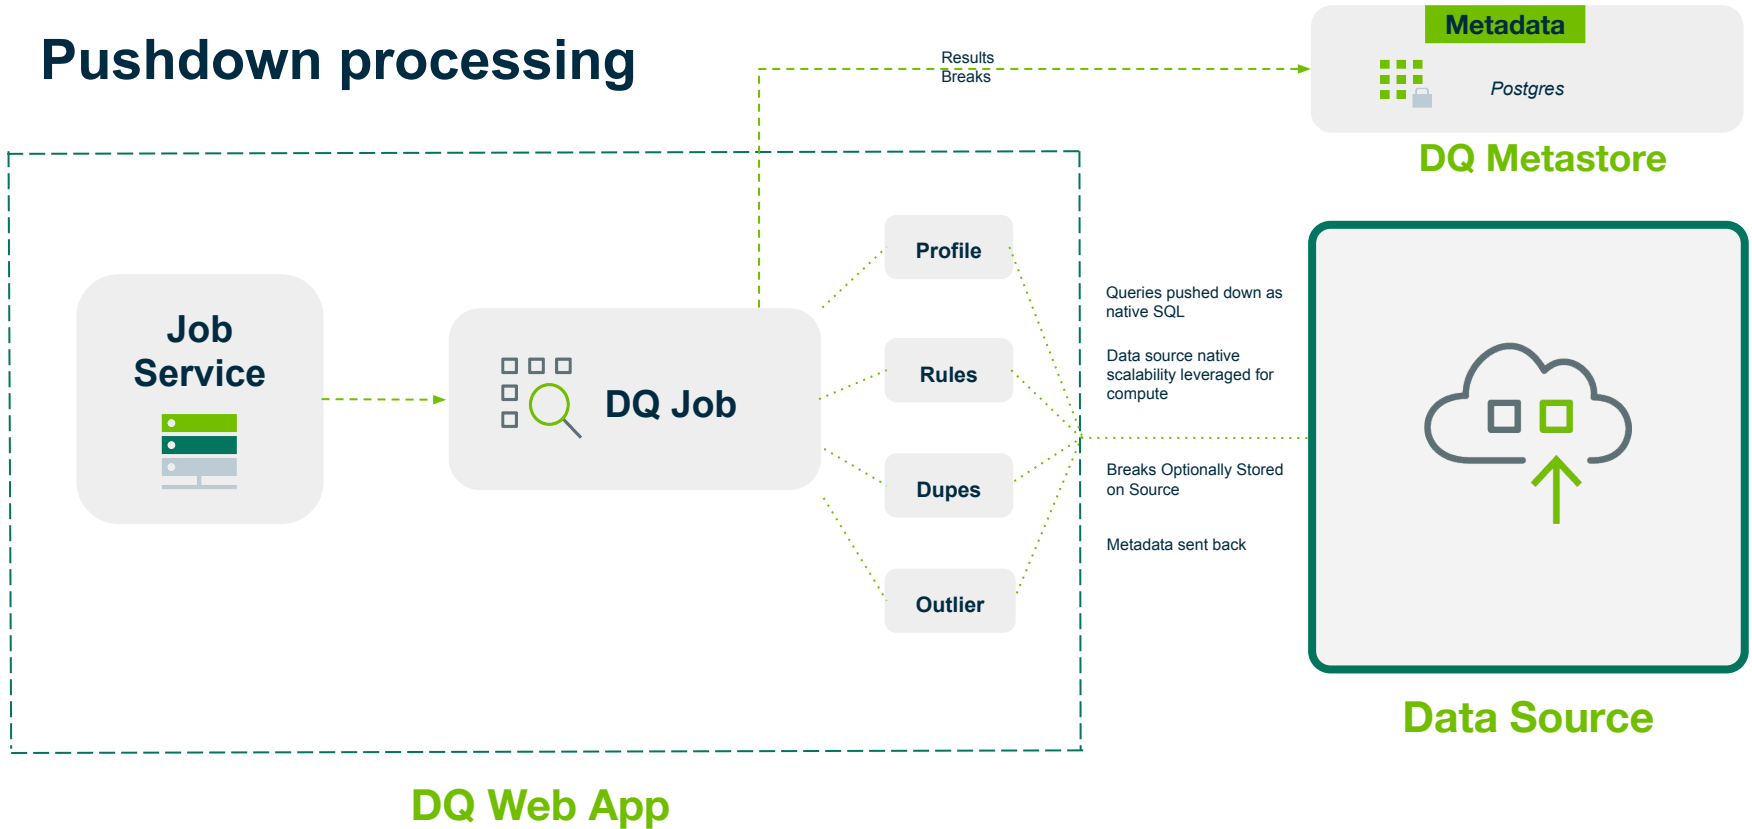

Collibra Data Quality

Tips & Tricks

- Live Demo
 - Getting Started with Collibra Data Quality:
AI SQL Assist Rule Generator
- DQ Pushdown

DQ Pushdown

Pushdown processing

** Asynchronous job execution in its own thread opens configurable number of jdbc connections.*

** Parallel execution of job activities queuing SQL queries across open connections.*

Collibra DQ Pushdown Platforms

DQ Pushdown Platform Name	General Availability
Snowflake	GA Now
Databricks	GA Now
Google BigQuery	GA Since 2023.11
AWS Athena	Beta Since 2023.09
AWS Redshift	Beta Since 2023.09

Breakout Rooms

(15 min)

- Please select the breakout room you'd like to join:
 - 1. **Data office tips** with Simla
 - 2. **Customizing dashboards** with Rohan
 - 3. **DQ AI SQL Assist, & DQ Pushdown** with Laurent
 - 4. **DQ/DIC API Integration** with Beth
- This session is interactive:
 - Feel free to raise your hand, we'll unmute you
 - Submit your question in the Q/A box

Let's wrap up!

- **Thanks again for your participation!** Please answer the poll just after leaving the session.
- Continue the discussion in Community in the [Data Citizens Circles](#) section.
- **Save the date for our upcoming Data Citizens Circles webinars:**
 - Showcasing Business Value: A Deep Dive into Collibra's Framework
February 29, 8 AM PT / 11 AM ET / 5 PM CET
 - Maximizing the Impact of Collibra Data Assessment Feature
